

Solarplate with a Twist

Imaging and Printing Techniques
with Robynn Smith and Diane Olivier

February 22 -23, 10-4PM

At Blue Mouse Studios North, 1890 Bryant St., San Francisco

Create new plates and/or revisit older ones in this Solarplate (Photopolymer Plate) workshop. Inking and printing will be emphasized through intaglio, relief and monoprint techniques. From the simplest methods to more complex layering techniques such as multiple drop printing and viscosity inking, you will get results you didn't think possible. While it will be possible to make new Solarplates in this workshop, the emphasis will be on getting the most from existing plates through inking, printing, and layering techniques. With vast teaching experience, Robynn and Diane will expand your vision while imparting concrete technical information. With only 8 participants, we can tailor this workshop to your needs.

We will use high quality, non-toxic, water-soluble materials in a beautiful, well-equipped studio. Experience the versatility of Solarplate printmaking through demonstrations and individualized instruction.

COST: \$240.00 includes all materials except paper and plates, available for purchase
Space is limited. Contact dcolivierdraws2000@yahoo.com 415-341-3959 to reserve!
